

## Transcript of the 1567 survey of Congresbury

From photocopies provided by Chris Short, Congresbury

### Conventions

1 Contractions such as barred ps, and terminal swirl for -es, have been expanded (all were obvious)

2 Dd (dimidi[o]) has been expanded to English ½ and use has been to use this, with no space between, after the whole number

3 Roman numerals have not been converted to arabic, but given in upper case to avoid constant confusion between 'I' the number and 'i' the letter (especially by the word processing software!) so modern 13½ acres will appear as XIII½. Terminal 'j' on a group of minimi representing a number has been rendered as I.

4 Upper and Lower cases have been preserved (although inevitably, transcriber or software will have made some mistakes). Checks reveal these to be <1%.

5 All written information, including pencil notes by a member of Dickie Broomhead's 1980s team have been included. These are headed by [square bracket] comments. This hand has also added the numbers 3(i), 3 (ii) etc to 11(ii). These presumably refer to the obverse and reverse of sheets. A [later hand] has made abbreviated comments. These are probably late[ish] 16<sup>th</sup> century, although there is insufficient data to be sure.

6 The 'stream of consciousness' style of the writing has been slightly altered in transcription. Groups of fields / tenements etc are separated from their stock phrases ('that is to say') by a single line. The fine line has also been separated for clarity.

7 Notes and comments in the first and third columns have been kept in the order in which they occur on the document, and spaced with some reference to the original (although this is not absolute due to the difficulty in preserving such spacing in copying). This appears to be in line with how the original is written.

8 Spaces between tenants or holdings are marked with a coloured line for clarity.

9 A 'cut down' version of the survey giving just the detail of the document will be produced in due course.

10 The descriptors for the tenancies ('A Bovier land', 'a fardle of land') are extremely unusual, and should be very helpful in plotting the tenancies.

11 I have reproduced bold text in the original with modern **bold** since this emphasises important clauses and summaries in the original

12 Areal measure in this document is using acres, perches and half perches. **This survey uses 'perch' to mean what is commonly called a 'rood', so the following applies in this survey only:**

**1 acre = 4 perches**

**1 acre = 0.405 Ha**

**1 [Congresbury] perch = 1012m<sup>2</sup>**

Normally, of course,

1 acre = 4 roods = 160 perches

13 Fiscal measure in this document uses 'imperial' measure

1 pound (£) = 20 shillings (s) = 240 pence (d)

Symbols used as derived from Latin:

'li' (librae) = pounds

's' (solidi) = shillings

'd' (denarii) = pence

1s = 5p 1p = 2.4d.

'ob' (obolus) = half of one penny
